

CHARLES WERE ANGOYE

Full-Stack Software Engineer

Kigali, Rwanda (GMT+2 / EAT) | KE: +254719403678 | RW: +250795589824 |

charleswereangoye@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented and adaptable Software Engineering student specializing in Full-Stack Development. Proven experience collaborating in fast-paced environments, bridging robust backend logic with responsive, high-performance user interfaces. Adept at leveraging modern frameworks (Next.js, React, Flask) and optimized database architectures (PostgreSQL) within Linux (Arch/CachyOS) environments. Seeking a remote global internship to deliver immediate value while building scalable web applications.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, Shell Scripting (Bash, Zsh), HTML5, CSS3
- **Frontend:** React, Next.js, Tailwind CSS, Framer Motion, Vanilla JS, Responsive Web Design
- **Backend & Databases:** Node.js, Flask, REST APIs, SQL, PostgreSQL, Supabase, Cloud SQL, SQLite
- **Tools & DevOps:** Git, Docker, Figma, VS Code, Bottles
- **Core Competencies:** Agile Methodologies, Asynchronous Collaboration, Algorithmic Logic, Technical SEO, Team Leadership

PROFESSIONAL EXPERIENCE

Backend Developer Intern | Infinity Innovations Co.

May 2026 - Present

- Stepped up as the backend team lead, taking ownership of the development workflow by assigning daily tasks and guiding team members.
- Conducted rigorous code reviews and safely executed final merges into the main branch, ensuring a clean and stable codebase.
- Collaborated on designing, developing, and maintaining clean, RESTful APIs to power scalable web applications.

- Managed data workflows and optimized backend architectures to support low-latency client requests.

TECHNICAL PROJECTS

Trajour: Forex Trading Journal & Analytics Dashboard

Role: Full-Stack Developer & UI Designer | Ongoing

- Architected and built a custom, data-dense financial journal designed to log and track trade setups, market pattern metrics, and personal psychology data.
- Engineered a premium, enterprise-grade user interface using Stitch, delivering a high-performance, cost-effective alternative to premium analytics platforms.
- Integrated PostgreSQL with Supabase to manage complex, relational financial data securely and efficiently.

InternLink: Student & SME Discovery Portal

Role: Backend Developer | 2026

- Co-developed a comprehensive dual-flow web platform connecting university students with small-to-medium enterprises (SMEs) for internship opportunities.
- Engineered an algorithmic, skill-based candidate matching system and integrated Chart.js to power interactive data visualization tracking dashboards.
- Successfully migrated the local database architecture from SQLite to a robust Cloud SQL configuration, ensuring security and scalability.

Personal Developer Portfolio

Role: Full-Stack Developer | 2026

- Designed and deployed a high-performance portfolio platform utilizing Next.js static generation to highlight professional development projects and tech skills.
- Implemented fully fluid, physics-based micro-interactions and dark/light mode toggles utilizing Framer Motion.
- Optimized asset loading, site architecture, and technical SEO to achieve exceptional performance and lighthouse accessibility scores.

EDUCATION

Bachelor of Science in Software Engineering

The African Leadership University (ALU) | Kigali, Rwanda | Jan 2025 - Expected Jan 2028

- Specialization: Full-Stack Development. Practical, project-based engineering curricula covering data structures, software architecture, clean code practices, and cross-functional

team collaboration.

International Certificate of Digital Literacy (ICDL)

Computer Pride | Nairobi, Kenya | May 2024 - Sep 2024

- Advanced digital workspace workflows, operating systems, and professional collaboration systems.
